Visitor from Spain

This trip to Poland has been an incredible experience. I enjoyed it a lot, most of this happiness is because I already had a lot of confidence with her, and it was also incredible the relationships with all of the other partners. They told us that it was very cold, but that was not an impediment to enjoy everything and every day we all got together to enjoy Poland and spend the day together. I learned a lot with the activities in the school, besides being able to know how the schools were there, very different from here with theater, karate, tracks ... We also had time to do activities outside the center such as bowling, going to the park, having dinner all together... With the family it was super comfortable because at all times they asked me if I needed something and they cared about me. I do not have any bad things to say about this trip. I hope to see you again and enjoy more with them. In summer they are going to return to Spain to be able to continue enjoying together thanks to the project, I am very grateful.
