

The Erasmus+ project in Austria was very great and exciting for me. After a few months we were able to meet our friends from this country. The trip to Austria was very tiring, but they greeted us very warmly and we went to a Pub. We could admire beautiful views especially from the castle of Hochosterwitz and from a boat trip on the lake Worthersee. I really liked activities from the Mobile Applications and the way they were run. We had a class of soldering and we could create a panel with the name of our school, which shone after connecting to a mobile phone in different colours. The school we went to was huge and modern. The trips organised by the school were so nice we visited the towns of Graz and Klagenfurt, a chocolate factory after which I couldn't look at chocolate and the Minimundus. We also were on Klagenfurt stadium where there was a forest in the middle and a few people of our group had to give an interview to an American TV which was a surprise. My host family was very nice I could feel at home and we spent some time together talking about different things connected with our countries. The food was very delicious. Our hosts organised a fantastic time after classes. We spent the time not only with our group but also with their friends, Spanish group and their host from Spain and Turkey. Austrians are very nice. They speak very good English, even older people and I could improve my English. We spent a very great time. I will never forget this I hope other guys won't either. If there is an opportunity like this in the future I'm sure I'll take part in it. Thank you all who were part of this project. Maybe we will meet in Austria or Poland in the future.

*Aleksandra*

Taking part in Erasmus+ project was (I think) the best choice I have ever made in my life. Now I am so glad that I convinced my mother to do it. That experience taught me a lot of things and was an incredibly good life lesson.

This project gave me opportunity to:

- >meet unforgettable people who I will never forget
- >improve my English, speaking skills (break the language barrier)
- >visit magnificent places
- >break stereotypes
- >learn about different cultures from the first hand
- >get a new perspective
- >try something completely new for me, like programming.

Also thanks to Erasmus I have got new dreams, hobbies and passions, for example: travelling, playing the guitar and a few more. My host guy was a great man and his family as well. I felt there like in my own home. Even the long way to school from his house (1h) did not disturb anything. To be honest, that was even better because it was the time I could meet better my new friend and his company.

I recommend Erasmus + project for every person who wants to try something new.

The week I spent in Austria was marvelous. Taking part in Erasmus+ project was the best decision in my whole life. During that week I've learnt a lot of things. I've got to know other countries' cultures (especially Austrian). I've also made so many friends and experienced new things. I've improved my English and now I am more confident to speak this language.

My host family was very lovely, helpful and welcoming, I really like them. My favourite part of this week was the trip to Graz, where I could see a lot of beautiful buildings and take a look on the whole city from Schlossberg. I also really enjoyed visit in Zotter Chocolate Factory (everyone knows why, I think). And of course I loved spending free time with our team.

I really recommend taking part in such projects, because they're an amazing opportunity to learn new things and also they're really entertaining so you just can't be bored. I had the time of my life for sure. I hope I'll meet my Austrian friends again, maybe next summer... We'll see!

*Julia*

The few days in Austria, Klagenfurt with Erasmus+ were great. I've learned a lot of new things about Austria and other countries. My favorite experience from staying in Austria is: Graz, chocolate factory, workshops and free time with our team. My host family was very nice and helpful to me. I really like them and they are a very amazing family. Thanks to this project we can improve our English, learn new things and see very beautiful places and buildings. By and large, this week was great. I'm very happy that I could be in Austria with my friends and hope to see our friends from Austria again.

*Anna*

The Erasmus plus in Austria was excellent. I learned new customs in Austria and basic programming. I spent great time with my friends from Poland, Spain, Turkey and Austria. My host family was really nice. I lived in Scheifling (one hour from Klagenfurt) and every day I used to travel to and from school by train.

The best time I spent in Graz, at the programming workshops and free time with our team.

By this project I've improved my English skills, wanted to learn German language and I fell in love with Austria.

It was such a great time for me and I hope we will met with our all Polish-Austrian team in the near future.

*Helena*

The week in Austria was very good. I am so glad that I could be part of this amazing project, because I met new friendly people and made new experiences. We visited many beautiful places and learned something new for me, like programming applications. I think that Austria is a beautiful country. There is a lot of beautiful buildings and landscapes. My favourite things in this week is sightseeing chocolate

factory, ship tour on Wörthersee and free time with our group. During this time I improved my English skills and relationships with my group. My host family was very good and open to me. I hope to meet our team again in the near future.
