

## Austrian feedbacks Poland

The trip to Poland was really cool and I learned a lot of the culture. My host family was really nice and in their flat I felt like at home. On the first day when we arrived in Nowa Sol we went to a Pizzeria and it was so much fun because the Pizzas were so big that no one could eat one alone. On the next day they showed us their school. I swear this school is really cool. They have a stage in the gym and two pianos. They have also a big sports ground and a fountain in the front of the school. The only thing which is a bit weird is that in this school is only attended by about 200 students. I also liked the app workshop because we made an app which can translate into English, German, Polish, Turkish and Spanish. It was so much fun to make it by myself with my host sister. On the evenings the whole group was walking through the city and we had a lot of fun.

At last I must say that the trip was really cool and I would like to go to Poland again and if there is any possibility I would like to do such a project again. (Emely Anunka)

I enjoyed the trip to Poland very much.

Everyone was so nice and friendly. We didn't know each other before but it was like we would know each other for a very long time.

My favourite things in Poland were the trips to the cities they were so beautiful and nice. And the workshops for programming the apps were also great fun.

The host family was very nice, they were so open to get to know me, they can't speak English so well but this was not a big problem.

The landscape was very nice and I enjoyed the view there. We went to a beautiful river called Odre river, I liked the place near the river it was so nice to sit there with the whole group to talk. We had great fun in our free time. And I am looking forward to meet all the students again. I think we'll have great fun in Austria.

This project helped me to improve my English. And I think without this project I wouldn't have visited Poland especially Nova Sol but it was very nice to see it. (Katharina Bogner)

The trip to Poland was a very great and new experience for me.

Already when we arrived in Nowa Sol our hosts welcomed us fantastically and we went directly to a pizzeria to eat something.

On the first day we had a sightseeing tour in the city which is very beautiful.

After the sightseeing tour we went for bowling, it was great fun.

On Tuesday we had a programming workshop which was also great.

The next day we drove by bus to Wroclaw a bigger city which was also worth seeing.

On Thursday we drove to Zielona Gora and visited a factory. And on the last day we finished the programming workshop and went to a barbecue in a park in Nowa Sol.

After this our group went to make a farewell party at the Orde river, such a beautiful place, which was a great finale for our trip.

Every day after the program we did something with our group which was everyday great and funny. My host family in Poland was very friendly and they did all that I felt like at home. I met so many great friendly people from all countries there and it was such a great trip that I want to do it again.

And all of us are looking forward to meeting our Polish friends again. (Marco Puster)

The project in Poland was really great I think. Especially because I like travelling and getting to know new people so much. The Polish students were really nice and warmhearted.

I really enjoyed exploring the cities and all the places in Nova Sól we were going to with them. The project we were working on was nice too. It's all about getting to know how to create Apps for Android, and in the end we had a translation app built by ourselves. Poland definitely should not be underestimated. I only brought back nice memories to Austria.

I can't wait to meet them again in September! (Ronald Taferner)

The trip to Poland was very interesting. I learned new things about the country. Let me just say one thing, don't expect people to speak English in Poland. I'm not talking about our hosts, they actually spoke really good English, I'm talking about cashiers, waiters and parents. But this was the only negative thing I noticed about Poland. Everything is so cheap there and most of the people are nice. The afternoons with the Austrian group and their hosts were lit AF. They taught us some Polish words and we became good friends. The food was delicious there, that's why we ate so much. My host family was nice, and they introduced me to the traditions in their country. The program was varied, so it never got boring. We visited Wrocław and Zielona Góra. After the daily program our group walked around Nowa Sól and till Friday we knew the whole city. The best part was probably the bowling, but the robotics workshop was fun too. All in all, I can say, that the trip has paid off, we got new friends and learned new things. Wasn't it all about that? (Karolina Pečenko)

The journey to Poland was such a great experience. Not only because of the opportunity of improving my English skills, but also to make new friends. It was great, that not only Austria, but also Spain and Turkey took part at the project. All the students were so friendly, so it was easy to integrate. We came very close in these 5 days, so it was hard to say goodbye. We've seen so many things and visited a lot of different cities. I'm still surprised at their diversity, so I can't even say which was my favorite one. But what I can say is, that the food in Poland is very delicious. I've tried some of the traditional meals, which tasted very good. They all have such interesting names, which are difficult to remember. I spent the whole week to get to know some Polish words but at the end I gave up. At least the workshops we had were easier to handle. It was nice that we got to know another opportunity how to create apps and could program them with our exchange partner. The fact that all of our group lived near was great, because we could meet also after the everyday program and spend the evenings together. I can't wait to see them again in October. (Timna Bošič)
