

DOMINIK GOŁEMBERSKI:

Our trip to Spain for Project Erasmus+ was a very exciting experience for me. Not only could I see the other country and learn how to make applications for Android, but also meet really great people from this region. Our hosts (Alberto, Guillermo, Dario, Alejandra, Marina and Paula) were really polite, helpful and funny teenagers with whom we could spend a lot of free time, make Polish food, create logo of the project and do many other things. We were also very happy about the fact that we could visit a beautiful city Cartagena and Murcia, see a lot of monuments in these cities and lie on the beach in Cartagena with our friends. I also improved my English and now I speak a lot more comfortably and freely. During this trip we learnt some Spanish words and sentences. I got to know some Spanish traditions and behaviours in different situations. I think all organisation of this project was perfectly done and faultless.

ŁUKASZ BUDNY:

These five days in Spain were amazing. I have met funny and awesome people in there. We were playing Paintball, bowling, we were on the beach. In general, we had a wonderful time together. Of course, I have improved my English. Five days of speaking only English every day helped me not to be afraid of talking in this language. I have learned to make apps. I have tried some Spanish food, it was my first time and I loved it. We saw two beautiful towns: Murcia and Cartagena. We visited some museums although I don't like museums, sightseeing in English was an interesting experience. The weather was excellent. I will never forget this stay in Spain.

NATALIA BUTKIEWICZ:

From 24th February to 2nd March I took part in an international project called "Erasmus+". I was in Spain for six days with five of my friends from school and of course two teachers. We were working to create a logo of mobile apps and we were learning how to create that app. monuments and the guide was telling us about the history of all those places we saw. I think the organisation was really good because everything was according to plan and we had a lot of free time so we could spend this time with our hosts and got to know them better. It was really cool because all of our hosts are close friends so we were going everywhere with everybody. They took us to different restaurants (so we could try their food), to games room, bowling, etc. We were on the beach too so we had a lot of fun. We have come closer to each other so it was so hard to say "goodbye" to them. They did their best to welcome us as well as they only could and they managed our time perfectly. I met their culture and their behaviour (I think it's really cool) and we were teaching one another a little bit of our languages. It was so funny! Besides that I think this project helped me to improve my English skills and now I feel more comfortable while I'm speaking English.

BARTOSZ CZARNECKI:

From 24th February to 2nd March I participated in an international project called "Erasmus +". I was in Spain for six days with two teachers and five students from my school. Each day was planned and focused on broadening our knowledge by visiting and participating in classes on mobile applications. We visited many places in Murcia and in Cartagena. Each our trip was accompanied by a guide who told us stories of the places what we visited. Each day and the trip were perfectly planned and organized. In addition, we also had free time which we spent studying with other participants of project and spent it on improving our English. Our hosts took us to local restaurants where we tried regional food which was fantastic. In addition to taking us to the restaurant, we were on paintball, on bowling and on the estate of one of the hosts. I spent this week having a great time with great people. I believe that this trip helped me improve my knowledge of mobile applications, improve my English and meet such wonderful people as our hosts.

EMILIA SEMAÑ:

From 24th February to 1st March 2019 I was in Spain to take part in a project Erasmus+. I am very glad I had a chance to participate in this project. The trip was very interesting. Now I know how to make mobile apps with a special website. I was a part of Spanish life. We could get to know very nice people and their culture, what was the most amazing thing on this trip. We were talking in English, so we improved our skills and now we feel more comfortable using this language. I also had a chance to learn some Spanish and use it in practice. We visited some interesting places in Murcia, Cartagena and other towns. This project showed me that Spain is a very beautiful country. Our time was perfectly organised. We didn't have time to be bored, because our Spanish friends took care of the entertainment. In five days I got very attached with this culture and people. I enjoyed the trip and fulfilling the project tasks. I am going to miss Spain for a long time.

ALEKSANDRA KSIĄŻEK:

Trip to Spain was an amazing experience, which I could only dream of. I've never thought that this kind of adventure would give me so many benefits. Because of Erasmus I have flown by plane for the first time. I had a chance to get to know a new culture and such generous people. Despite the fact that the trip lasted for only 6 days I found true friends there. In Spain I had a lot of fun but I learnt few things too. My English is better now and I know how to do apps on my phone. I worked on a logo of the project with Spanish girls. This was a good opportunity to practice your creativity and art skills. The organisation of the meeting was perfectly done. My host family treated me nicely and they were so caring. These polite people showed me the beauty of Spain and because of them I fell in love with this country. I think it was one of my favourite trips in my life. I will never forget it. Going there has been an amazing lesson for me.
