MARCH, 2019

Hi, I'm Marina from Spain.

I'm going to talk about my experience with the Erasmus + KA 229 in my school.

I have been asked to describe what I've been through these last week, but honestly no words can accurately describe the Erasmus experience.

I've met wonderful people that helped me to open my mind by sharing different ideas and cultures, and I also learned how to see things from a different perspective.

I reckon I've been so lucky with my host girl, Emilia. She is a really nice person, and the best thing is that we've got many things in common. Although we have all a really good relation, even we have a WhatsApp group to keep in touch. We all get along very well just in a few days, and we want to see each other again, now we have polish friends for our whole life! It's been an amazing experience, the project, creating the logo , using apps, etc.. I would recommend it to everyone. I would repeat it again thousand of times.

Best regards.
